

Area of solar power stations in China

Overview

Data and information about Solar power plants and their location plotted on an interactive map of China.

Area of solar power stations in China

About Us - AREA

AREA is the world where possibility meets occasion. Named for the legendary Manhattan nightclub that turned evenings into experiences, AREA inhabits the tension between intimacy and spectacle. Under

Dresses - AREA

AREA is the world where possibility meets occasion. Founded in New York in 2014, AREA develops and produces its collections in its Milan atelier. Complimentary ground shipping for orders over \$1000.

[A 10-m national-scale map of ground-mounted photovoltaic power](#)

Above all, we provide a 10-m national-scale map for PV power stations in China of 2020, which would be of particular interest to the following research areas.

Solar power in China

OverviewHistorySolar resourcesSolar photovoltaicsConcentrated solar powerSolar water heatingEffects on the global solar power industryGovernment incentives

China is the largest market in the world for both photovoltaics (PV) and solar thermal energy. Its PV capacity crossed 1,000 gigawatt (one terawatt, 1 TW) in May 2025. By June 2025, China's PV capacity surpassed 1,100 gigawatt. In

2024, China added 277 gigawatts (GW) of solar power, which was equivalent to 15% of the world's total cumulative installed solar capacity.

[China continues to lead the world in wind and solar,](#)

By the first quarter of 2024, China's total utility-scale solar and wind capacity reached 758 GW, though data from China Electricity Council put the

Fall Winter 2025 - AREA

AREA is the world where possibility meets occasion. Founded in New York in 2014, AREA develops and produces its collections in its Milan atelier. Complimentary ground shipping for orders over \$1000.

[China opens world's biggest solar farm that spreads](#)

Data released by China's National Energy Administration last year revealed that the country's solar electricity generation capacity grew by a

[China's solar capacity installations grew rapidly in 2024](#)

China has more utility-scale solar than any other country. The 277 GW of utility-scale solar capacity installed in China in 2024 alone is more than twice as much as the 121 GW of utility
