

Cairo solar air conditioning is difficult to promote Wana

Overview

Those sky-high temperatures are partially a product of the so-called 'heat island effect,' which sees buildings, roads, and other infrastructure absorb and re-emit the sun's warmth more than natural landscapes. Research shows that things will only get worse for cities due to the.

Cairo solar air conditioning is difficult to promote Wana

[The Opposite of SkeLeton: \(Or "Fun with Antipodes"\)](#)

"The term "antipodes" refers to two places on opposite sides of the earth so that a straight line drawn through the earth from one to the other passes through the center of the earth. To be exact

[As it bakes, Egypt looks to the cooling power of the sea](#)

The Seawater Air-conditioning system is estimated to cost US\$117 million in building production facilities and a further US\$20-25 million for the
