

Can I plant creepers on photovoltaic panels

Overview

The short answer is: not necessarily. Plenty of rooftop Solar PV systems around the country do not have a critter guard and never experience damage from squirrels or other rodents. It is important to consider environmental and geographical factors when assessing the need for critter.

Can I plant creepers on photovoltaic panels

What Are Solar Critter Guards

Ultimately, if your solar panels are mounted on a roof and exposed to open air, critter guards are highly recommended. Professional installation is

Solar Panel Critter Guard

A critter guard for solar panels is essentially a protective barrier that blocks the gap between your panels and roof, preventing animals from treating your solar system like an all-inclusive
