

Collect abandoned photovoltaic panels

Overview

Contact the solar panel manufacturer for detailed instructions on cleanup and disposal. Did You Know?

Solar Panels a Toxic.

Collect abandoned photovoltaic panels

[Guidance on State Regulation for Solar Panel Recycling](#)

Understand solar panel recycling regulations in your state. SOLARCYCLE can help you comply with local rules on solar disposal, develop a solar decommissioning

[California landfills are filling up with toxic solar panels](#)

California, a national leader in the solar market, has no plan for safely recycling more than 1 million photovoltaic panels that will soon need to be

Collect by WeTransfer

The best way to save, organize and share ideas from all your apps

[Solar Panel Recycling California , Solar Panel Recycling California](#)

Prepare and dispatch your solar panels to our Solar Recycling Company center for secure, trackable recycling, with all logistics managed to meet sustainability and safety standards.

[California Regulations , Solar Panel Recycling](#)

Our decommissioning teams and technologies

allow us to specialize in true solar panel recycling, recovering all materials and reintegrating them into the supply chain.

[Select Clean Earth Facilities in California Now](#)

Clean Earth is committed to proper end of life management of solar PV panels, containing components hazardous to our environment and materials

[California's Approach to Solar Panel Recycling:](#)

California is making strides in solar panel recycling, a vital part of its wider environmental strategy. In leading by example with its ecological initiatives

Background
Are Solar Panels Hazardous Waste?
Overview of Hazardous Waste Regulations
State Solar Panel End-Of Life Policies
Additional Resources
Hazardous waste testing on solar panels in the marketplace has indicated that different varieties of solar panels have different metals present in the semiconductor and solder. Some of these metals, like lead and cadmium, are harmful to human health and the environment at high levels. If these metals are present in high enough quantities in the sol See more on epa.gov
