

Colored thin film solar glass

Overview

This film is designed for long-lasting application to (but not limited to) glass. Apply to the interior side of glass: windows, doors, skylights, and curtain walls.

Colored thin film solar glass

Solar Graphics , Reeded Glass Film

Solar Graphics film materials are designed to be applied in multi-layers (up to 6) to obtain a variety of color combinations for specific color matches, reflectance, transparencies, translucencies, or opacities.
