

# Current status of solar power generation in China's deserts

## Overview

---

These solar projects are expected to rehabilitate 7,000 sq km of desert, where desertified land was 26. China has installed 1 GW solar farms in Ningxia and Majiatan under Baofeng's 30 GW target, combining power generation with land rehabilitation to.

## Current status of solar power generation in China's deserts

### [China enlists solar panels in war to halt desert sands](#)

Solar panels installed over the empty, sun-baked deserts are a recent and growing part of the arsenal.

## Locating the suitable large-scale solar farms in China's deserts with

China deserts' solar power potential reduces 73-170 % of global emissions. Using 6-14.7 % of China's deserts can meet the country's electricity demand by 2025. Desert areas offer
