Solar power in the United States

Solar power includes solar farms as well as local distributed generation, mostly on rooftops and increasingly from community solar arrays. In 2025, utility-scale

Spring 2025 Solar Industry Update

As the energy crisis fueled by Russia's invasion of Ukraine has subsided, demand for residential solar systems in the EU has declined and several residential solar incentive schemes

Solar thermal energy

Discover all statistics and data on Global solar thermal energy now on statista !

Electricity explained

Solar photovoltaic and solar thermal power plants provided about 7% of total U.S. utility-scale electricity and accounted for 28% of utility-scale electricity generation from renewable sources

[Market Developments , Concentrating Solar Thermal](#)

Following the first-ever year of contraction in global CSP capacity, 200 MW was added in the United Arab Emirates in 2022 to reach a total of 6.3 GW worldwide.

[Solar energy status in the world: A comprehensive review](#)

For each country, a comprehensive effort is made to define the current operational solar power status and its corresponding academic solar energy research.
