

Does 5G base station consume electricity

Overview

"A 5G base station is generally expected to consume roughly three times as much power as a 4G base station. And more 5G base stations are needed to cover the same area," -IEEE Spectrum, 5G's Wa.

Compared with 4G sites, 5G stations can consume nearly three times more power, and the number of 5G sites has increased substantially to address coverage reduction.

[What is the Power Consumption of a 5G Base Station?](#)

These 5G base stations consume about three times the power of the 4G stations. The main reason for this spike in power consumption is the addition of massive MIMO and beamforming,
