

Generator pulley wind cannon

Overview

The wind cannon generated "slugs" of compressed air using the combustion of a 2:1 mixture of and obtained from the of water inside of a long barrel that was bent at one end. These blasts were intended to rack and strain the frame of enemy aircraft to the point of breaking or at the very least making difficult for pilots to maintain control of their aircraft, causing them to crash. According to Hogg, while Zippermayr's idea was sound in theory, it was better suited for a laboratory scale model th.

Generator pulley wind cannon

Wind Cannon

The wind cannon generated "slugs" of compressed air using the combustion of a 2:1 mixture of hydrogen and oxygen obtained from the electrolysis of water inside of a long barrel that was bent at one end. These blasts were intended to rack and strain the frame of enemy aircraft to the point of breaking or at the very least making difficult for pilots to maintain control of their aircraft, causing them to crash. According to Hogg, while Zippermayr's idea was sound in theory, it was better suited for a laboratory scale model th

The Creative Science Centre

Summary: Described is a simple, cheap and versatile homemade windmill and electrical generator suitable for a school class to explore many aspects and practicalities of using wind to generate

Generators at Tractor Supply Co.
