

Homemade lifting hook for photovoltaic panel hoisting

- ☑ High energy density and long cycle life
- ☑ Modular structure

- No need to replace the battery
- Shorter charging time
- Meets 99% EV car

Overview

To lift solar panels onto your roof, you can use a ladder railing system, a pulley system, a lifting bag, or even DIY lifting systems using a pulley. Carrying them up the ladder can also be done with products like the solar panel caddy, and all of these ideas will.
