

Household photovoltaic microgrid system

Overview

A home microgrid is a small, self-contained energy system that can generate, store, and manage its own electricity. It's typically connected to the larger utility grid but can "island"-or disconnect-and operate independently during outages or emergencies.

[Household Trends and Outlook Pulse Survey \(HTOPS\)](#)

The Household Trends and Outlook Pulse Survey (HTOPS) is a national survey by the U.S. Census Bureau (Census). The purpose of the survey is to collect information on topics such as

Income in the United States: 2024

This report presents data on income, earnings, & income inequality in the United States based on information collected in the 2025 and earlier CPS ASEC.

[Household Income in States and Metropolitan Areas: 2024](#)

This report presents data on median household income and the Gini index of income inequality based on the 2023 and 2024 American Community Surveys (ACS).

[Median Household Income by County in the United States and Puerto](#)

This data visualization shows the median

household income statistics for the United States and Puerto Rico.

Microgrid Overview

While pairing a solar photovoltaic system with energy storage to support a single building (behind the utility meter) may be considered a small microgrid by some, for the purposes of this document we
