Types of Welds

A square groove weld is used as it is a simple and cheap weld joint to produce. Square groove welds are usually used for sheet metal (material less than 5 mm in thickness).

Let's face it - welding horizontal brackets for photovoltaic panels isn't exactly rocket science, but get it wrong, and you'll have solar modules doing the cha-cha slide during the next windstorm.

Welding

Welding is a fabrication process that joins materials, usually metals or thermoplastics, primarily by using high temperature to melt the parts together and allow them to cool, causing fusion.
