

# Human research on solar power generation

## Overview

---

By linking global productivity, investment capacity, and the energy transition, the paper highlights how solar technologies can power the next chapter of human development-while pointing out where innovation is still needed to improve long-term sustainability and energy return.

## Human research on solar power generation

---

### [The momentum of the solar energy transition](#)

We focus on identifying the existence of a tipping point for solar and wind, assuming that no further policy is adopted to usher in a solar and wind-dominated electricity system.
