

Linear photovoltaic panels

Overview

Linear concentrating solar power (CSP) collectors capture the sun's energy with large mirrors that reflect and focus the sunlight onto a linear receiver tube.

Features - Linear

Linear is the system for modern product development. Streamline work across the entire development cycle, from roadmap to release.

Linear for Agents

Build and deploy AI agents that work alongside you as teammates.

Close the gap between planning and building
Consolidate project specs, documents, issues, customer feedback, and updates in one centralized location.

[A Detailed Performance Model for Photovoltaic Systems](#)

The model was used to investigate the effects of shading for different operating conditions to determine the optimal configuration of a PV array. Accuracy of the model was validated through a series of

Download Linear - Linear Docs

Linear is available on browsers, macOS, Windows, iOS and Android.

Issue tracking is dead - Linear

Linear is the shared product system that turns context into execution. It holds feedback, intent, decisions, plans, and code, shapes that context

into work, and helps humans and agents
