Choosing a solar installation company also means researching and deciding on the type of solar panels you want to install. There are three main types of solar panels available for residential use: monocrystalline, polycrystalline and thin-film. You also have a fourth option, solar roofing shingles, which is a newer and more expensive technology but See more on forbes

## **What does `[:-1]` mean/do in python?**

Working on a python assignment and was curious as to what `[:-1]` means in the context of the following code: `instructions = f.readline()[:-1]` Have searched on here on S.O. and on Google but

## **Meaning of `list[-1]` in Python**

I have a piece of code here that is supposed to return the least common element in a list of elements, ordered by commonality: `def getSingle(arr): from collections import Counter c = Counte`

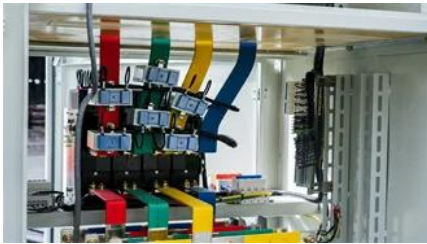

## [What is the difference between `list` and `list\[:\]` in python?](#)

When reading, `list` is a reference to the original list, and `list[:]` shallow-copies the list. When assigning, `list` (re)binds the name and `list[:]` slice-assigns, replacing what was previously in the list.

## Google Search Help

Official Google Search Help Center where you can find tips and tutorials on using Google Search and other answers to frequently asked questions.

## [What is the difference between list and list \[1:\] in Python?](#)

By using a : colon in the list index, you are asking for a slice, which is always another list. In Python you can assign values to both an individual item in a list, and to a slice of the list.

## Python: list of lists

The first, [:], is creating a slice (normally often used for getting just part of a list), which happens to contain the entire list, and thus is effectively a copy of the list. The second, list(), is using the actual

## Google Sheets function list

Here's a list of all the functions available in each category. When using them, don't forget to add quotation marks around all function components made of alphabetic characters that aren't referring to

## [Find an Active Solar or Storage Installer Near You](#)

Disclaimer: This tool provides a list of recently completed (last 24 months) solar PV and energy storage projects in a given area (zip code, city or county) and

## [Difference between List, List>, List, List, and List](#)

The notation List> means "a list of something (but I'm not saying what)". Since the code in test works for any kind of object in the list, this works as a formal method parameter. Using a type parameter
