

Netherlands solar desert

Overview

With land for renewables short nearly everywhere in the world, the Dutch experience - including putting solar on car parks, commercial lakes, sheep grazing fields, strawberry farms, disused churches, train stations and airfields - could inspire better placing of renewables.

Solar power in the Netherlands

Nearly 80% of solar power installed in the Netherlands in 2017 was for small systems of less than 10 kW, a large part being rooftop Solar PV. Larger systems over 500 kW accounted for just 6.9% of the total. By the end of 2018 private residential rooftop systems had an installed capacity of 2,307 MW, businesses rooftop systems 1,662 MW whilst solar parks amounted to 444 MW.

[Applying for a Schengen visa for the Netherlands in the United States](#)

With your Schengen visa you can travel to the Netherlands or another Schengen country. The visa allows you to stay in the Schengen area for a maximum of 90 days in any 180-day period.
