

# Pakistan Nuclear Solar Power Generation System

## Overview

---

ISLAMABAD: Pakistan's net nuclear energy generation touched a record 21.7 terawatt-hours (TWh) in 2024, even though overall electricity costs and inefficiencies reached a systematic tipping point, forcing consumers to switch to renewables, particularly solar, said the World Nuclear.

## Nuclear and solar growing in tandem

Pakistan cannot afford to lock itself into expensive, centralised projects without accounting for the silent but massive adoption of rooftop solar. The next phase of capacity planning must

## List of power stations in Pakistan

Pakistan has a total installed power generation capacity of 49,270 MW as of 13 September, 2024 which includes 28,766 MW thermal, 11,519 MW hydroelectric, 1,838 MW wind, 780 MW solar, 249 MW bagasse, 3,620 MW nuclear and 2,498 MW of net metering capacity.

### 'Pakistan produced record 21.7TWh nuclear energy in 2024'

In 2024 alone, the imported solar generation capacity amounted to 22GW (compared to 46GW of mostly conventional capacity operating in the public grid in 2023), primarily adding to

## **Pakistan Electricity Review 2025**

Pakistan's power generation capacity grew to 46.2 GW with the addition of three new solar plants, increasing the share of utility-scale renewables in the country's installed capacity from 6% to 7%.
