

Power grounding and base station grounding

Overview

Placing an 8' ground rod into the ground directly below the antenna is recommended for a base station. All these connections should be sealed, preferably with a Coax Seal.

Power grounding and base station grounding

[How Are Base Stations Protected Against Lightning?](#)

In base station lightning protection design, the grounding grid and ground busbars are key components. With proper design, they can effectively reduce the impact of lightning on the station.
