

Self-phototropism solar power generation system

Overview

But now, a group of American scientists took inspiration from heliotropic plants and created a solar power system that can automatically change its positioning, which allows it to capture up to 400% more sunlight compared to traditional solar technology.

Solar generator

The term "solar generator" is often used in consumer markets to describe these self-contained systems, as they intend to compete with and/or replace traditional generators that require fuel.
