[SolarEdge Error Codes & Fault Codes: Troubleshooting](#)

If your SolarEdge inverter fault code points to a hardware failure-or if the inverter doesn't recover after a reset-it may be time to check your

[Inverter Status and System Performance Indications](#)

Your inverter has a switch and three colored LEDs that indicate system information, such as errors or performance. The following tables detail the possible LED and switch combinations, and what they

Inverter Error Codes

Reset the inverter: Turn off the inverter, wait for a few minutes, and then turn it back on to see if the fault clears. Check grid conditions: Verify that

Solar Power Troubleshooting Guide

If all three LEDs are on, the inverter is in its initializing phase which is a normal operating state as well. All other signals indicate a disturbed operating state.
