

There are several types of photovoltaic double pile fixed brackets

Overview

At present, there are 3 types of brackets used in most PV power plants: fixed conventional bracket, adjustable tracking bracket and flexible PV bracket. This refers to the mounting system where the orientation, angle, etc.

Photovoltaic ground bracket installation options

First, there are many fixing methods, such as pile foundation method (direct burial method), concrete block weight method, pre-embedded method, ground anchor method, etc.

Photovoltaic Double Pole Ramming Pile Solar Ground Rack Steel

Double Pole ground bracket is applied for large commercial and utility PV system on non-sandy ground, suitable for both framed and frameless module installation.

Necessary accessories for PV installation: brackets -

Detailed summary of photovoltaic bracket types

Bolt-fixed bracket: The bracket is fixed to the foundation by bolts. Ballasted bracket: The bracket is fixed to the foundation by ballast (such as stones, concrete blocks, etc.).

When the installation site is too hard or there are too many crushed stones, the screw ground pile can be driven into the ground first, and then fix the column on the screw pile.
