[Getting "Lock wait timeout exceeded; try restarting transaction" even](#)

```
mysql> update customer set account_import_id = 1; ERROR 1205 (HY000): Lock wait timeout exceeded; try restarting transaction I'm not using a transaction, so why would I be getting this error? I
```

[How do you clear the SQL Server transaction log?](#)

The transaction log contains a lot of useful data that can be read using a third-party transaction log reader (it can be read manually but with extreme effort though). The transaction log is

3c Energy

Storage Capacity: All rights and products and attributes associated with the maximum dependable operating capability of the Storage Facility to be charged with, store and discharge electric energy.

concurrency

A transaction is a unit of work that you want to treat as "a whole." It has to either happen in full or not at all. A classical example is transferring money from one bank account to another. To

Transaction marked as rollback only: How do I find the cause

Participating transaction failed - marking existing transaction as rollback-only So I just stepped through my code to see where this line is generated and found that there is a catch block

The transaction log for the database is full

I have a long running process that holds open a transaction for the full duration. I have no control over the way this is executed. Because a transaction is held open for the full duration, whe

"This SqlTransaction has completed; it is no longer usable

```
{ return transaction nnection.Query(command, new DynamicParameters(param), transaction, commandType:
```

CommandType.StoredProcedure); } } } It looks as though the outer
