

# **Transfer of China s solar energy equipment for communication base stations**

## Overview

---

In a shocking revelation that has sent ripples through the cybersecurity and renewable energy communities, security experts have discovered undocumented communication devices-including cellular radios-hidden inside Chinese-manufactured solar power inverters and batteries.

## Transfer of China s solar energy equipment for communication base

### [Cybersecurity Alert: Undocumented Radios Discovered in Chinese Solar](#)

In a shocking revelation that has sent ripples through the cybersecurity and renewable energy communities, security experts have discovered undocumented communication

### [U.S. officials Investigating Rogue Communication Devices in Solar](#)

U.S. energy officials have launched an investigation after discovering unauthorized communication equipment embedded within Chinese-manufactured solar power inverters connected

### [Rogue communication devices found in Chinese solar power inverters](#)

Power inverters, which are predominantly produced in China, are used throughout the world to connect solar panels and wind turbines to electricity grids. They are also found in batteries,

### [Rogue communication devices found in Chinese solar power inverters](#)

LONDON, May 14 (Reuters) - U.S. energy officials are reassessing the risk posed by Chinese-made devices that play a critical role in renewable energy infrastructure after unexplained

### [Hidden communication devices found in solar inverters from China](#)

U.S. energy officials have discovered hidden communication devices in solar energy equipment supplied from China. These are primarily inverters used to connect solar panels and wind

### [U.S. Reassesses Chinese-Made Solar Equipment After Hidden](#)

U.S. energy officials are reviewing security risks posed by Chinese-made components in renewable energy systems after discovering hidden communication devices in some units, according

### [Low-carbon upgrading to China's communications base stations for](#)

To address the energy consumption issues of communication base stations, we have implemented a series of measures to transform traditional base stations into low-carbon base stations.
